

WHAT IF

**OSHA springs an audit on
your company this coming
year . . . ?**

Just what you need—an OSHA inspection—especially if you’ve missed recent changes in the regs, or your compliance rates have slipped.

That’s why I think you won’t want to miss the coming 12 issues of *Safety Compliance Alert*.

Dear Subscriber:

As you know, OSHA inspections can be *unnerving*—for you, for your employees and for your top management.

That’s why when the audit notification arrives, you want to know you’re up to date on new OSHA regs and that your training and compliance rates are up to snuff.

In fact, when you’re confident you and your people are in full compliance, you can *almost* relax—and take pride that you’re on top of it all.

As you know, this is what *Safety Compliance Alert* is all about—helping you stay on top of changes in OSHA regulations and penalties and making sure your training and compliance programs are really working.

Now it’s time to renew this source of great ideas for increasing employee compliance and keeping yourself up to date on new OSHA requirements.

You’ll stay refreshed on what others are doing to dramatically reduce accidents related to PPE, lifting, lockout/tagout, slips, trips and falls, and many other dangers.

Finally, you’ll also continue access to our website — www.SafetyComplianceAlert.com — to help you quickly prepare training units, supply you checklists for a wide variety of safety threats and let you find out how other safety professionals are solving tough compliance challenges.

So you don’t miss a single issue of *Safety Compliance Alert*, please take a minute to return the bottom section of your personalized renewal notice today.

I’m sure you’ll value the vital updates and practical tips you receive—and I’m sure you’ll handle your next OSHA audit with absolute confidence.

Sincerely,

Curt Brown
Editorial Director
